

Task 3 Report — Coding & Collaboration Platforms

Digital Literacy Quiz Total points **8/10**

This digital literacy quiz was created to let students' understand safe online practices, communication, and digital responsibility. It helps raise awareness and encourages students to develop better and more responsible digital habits.

The respondent's email (shlok.25mim10219@vitbhopal.ac.in) was recorded on submission of this form.

✓ 1. Which of the following best describes a risk of maintaining an inaccurate digital profile? *2/2

- ☐ A. Increased social media followers
- ☐ B. Better academic performance
- ☒ C. Mismatch between claimed skills and actual ability affecting opportunities ✓
- ☐ D. Faster internet speed

✓ 2. Why do phishing attacks often succeed even when users are aware of them? *2/2

- ☐ A. Users have no internet access
- ☐ B. Users always ignore emails
- ☒ C. Emotional urgency and lack of careful verification by users ✓

Figure:4

For this task, I explored both a coding practice platform and a collaboration tool. I used **HackerRank** for coding practice and **Google Forms** for collaboration and data collection. On HackerRank, I completed a beginner-level Python challenge titled “Say Hello, World!” which helped me understand the basic structure of coding problems and how to write and submit code in an online environment.

For the collaboration part, I created a **Digital Literacy Awareness Quiz** using Google Forms. The form included five questions based on topics like safe internet practices and responsible digital behavior. I also viewed the responses in Google Sheets, which helped me understand how data is collected and analyzed.

Through this task, I practised basic coding skills as well as learned how to create interactive quizzes and manage responses digitally. These tools will help me academically by improving my problem-solving ability, supporting collaborative learning, and enabling me to collect and analyze information efficiently for future projects and assignments.
